

# 1MW Communication Power Supply Cabinet for Indian Tunnels

## Overview

---

What are the requirements for supplying power to a tunnel?

Most of the tunnel equipment and systems require electrical energy to operate. Therefore, equipment for supplying power to the tunnel must be installed. This installation has to satisfy two essential requirements: Meet the needs under all operational situations (normal, degraded, critical, emergency).

Why should you invest in advanced tunnel communication solutions?

Investing in advanced tunnel communication solutions ensures strong, continuous communication channels, critical for passenger safety and operational efficiency. Radio Communication System Used for communication during maintenance, between train guards and drivers, and in emergencies. It includes:

What type of power does a tunnel need?

Meet the needs under all operational situations (normal, degraded, critical, emergency). The power required for supplying a tunnel is directly related to the nature and number of equipment installed in it. Depending on the amount of electrical energy required (kWh), power may be supplied in low voltage or high voltage (Fig. 1).

What is an integrated energy cabinet?

As one of our highlights, the integrated energy cabinet integrates multiple functions such as power distribution, environment monitoring and safety protection into one, providing a full range of energy management and protection for communication sites.

## 1MW Communication Power Supply Cabinet for Indian Tunnels

- LiFePO<sub>4</sub>
- Wide temp: -20°C to 55°C
- Easy to expand
- Floor mount&wall mount
- Intelligent BMS
- Cycle Life:≥6000
- Warranty :10 years
