

# 1MW outdoor photovoltaic cabinet for steel plant

## Overview

---

What is a photovoltaic grid-connected cabinet?

Photovoltaic grid-connected cabinet is a distribution equipment connecting photovoltaic power station and power grid, and is the total outgoing of photovoltaic power station in the photovoltaic power generation system, and its main role is to act as the dividing point between the photovoltaic power generation system and the power grid.

How can Lt be used in a photovoltaic power generation system?

Fixed installation, large space, good heat dissipation. It can be used in solar photovoltaic power generation systems, and can also be used to convert, distribute and control electrical energy between photovoltaic inverters and transformers or loads.

How does Huawei's one site one cabinet power cabinet work?

The upgraded site halves electricity fees and cuts O&M costs by 75%, and reduces carbon emissions by eight tons per year. Huawei's One Site One Cabinet power cabinet solution uses a compact, high-density design to simplify site management, reduce energy use, and support sustainable operations.
