

500kW power supply cabinet from Philippines Communications for IoT base stations

Overview

How many mw can a DPA 500 Cabinet run?

Cabinets can operate in a parallel configuration to build a system of up to 3 MW (horizontal scalability). The advanced UPS design of DPA 500 provides the highest degree of protection in critical applications where the load must be fed with quality power.

How much power does a DPA 500 provide?

The DPA 500 delivers power protection from 100 to 500 kW (one to five modules) in a single cabinet (vertical scalability). Cabinets can operate in a parallel configuration to build a system of up to 3 MW (horizontal scalability).

What is ABB's DPA 500 modular uninterruptible power supply (UPS) training?

The training is offered to ABB's customers, partners and own personnel. Conceived for medium-sized and large data centers, ABB's DPA 500 modular uninterruptible power supply (UPS) fulfills power requirements from 100 kW to 3 MW and provides maximum availability for those who aim for zero downtime as well as a low cost of ownership.
