Overview

Should electricity storage facilities be established by grid operators?

Electricity storage facilities to be established by grid operators – electricity storage facilities to be established by distribution companies with the approval of the Board, if they prove that they are more economical than new network investments through cost-benefit analysis and by including them in their investment plans.

Will Turkey achieve its smart grid ambitions by 2035?

Aligned with the Turkey Smart Grids 2023 Vision and Strategy Determination Project, developed by the Electricity Distribution Services Association in collaboration with the Energy Market Regulatory Authority, Turkey aims to realise its smart grid ambitions by 2035.

What is the future of energy storage?

Moreover, there have been significant investments in battery technologies, specifically targeting the storage and the effective use of energy from volatile sources such as wind and solar power. Various projects are underway to integrate energy storage systems into smart grid infrastructure.

Are storage activities legal in Turkey?

The first legal provision on storage activities in Turkish law was introduced with the subparagraph (e) added to Article 14 of the Electricity Market Law No 6,446 (EML) with the amendment dated 21 March 2018. With the relevant amendment, storage activities have been regulated as an activity which can generally be conducted without a licence.
