

Austria solar-powered communication cabinet wind power infrastructure construction

Overview

Is Austria poised for a significant transformation in solar energy?

Austria's solar energy sector is poised for a significant transformation as the government updates its subsidy guidelines to incentivize more power purchase agreements (PPAs) for solar photovoltaic (PV) projects.

What is the biggest financing project for green energy in Austria?

This is the biggest financing project for green energy from solar and wind in Austria that the EIB has ever participated in. Burgenland Energie is Austria's largest wind power and photovoltaics company. In the last two years, it has developed the country's largest wind and solar project pipeline, encompassing capacity of around 2 000 MW.

How will Austria's construction industry grow in 2025?

Austria's construction industry is projected to grow by 4.0% in 2025, reaching a market size of EUR 36.72bn. This growth is supported by increased orders in construction and civil engineering, a rise in housing loans, and declining inflation rates, coupled with substantial investments in infrastructure and energy projects.

Does Burgenland have a wind and solar project portfolio?

Burgenland Energie has developed a wind and solar project portfolio in Burgenland encompassing some 2 000 MW of wind and solar power generation capacity by 2030 – around 20% of Austria's current solar and wind energy capacity. The EIB has signed agreements for the largest green energy financing package in Austria it has ever been a part of.
