

# Bahrain energy storage new energy project

## Overview

---

What does BAPCO energy do for Saudi Arabia?

All electricity produced will be transmitted to Bapco Energies' load centre in Bahrain, supporting the kingdom's energy needs and accelerating its transition to renewable energy. The initiative also positions Saudi Arabia as a regional energy export hub while helping neighbouring countries meet emissions-reduction targets.

What is Saudi-Bahraini energy agreement?

The agreement was unveiled during the Saudi-Bahraini Coordination Council meeting in December 2025. The project is planned in multiple phases, with a total generation capacity of up to 2.8 gigawatts.

How many megawatts will Bahrain produce by 2025?

Bahrain will have to produce 280 megawatts of electricity from renewables by 2025, increasing to 710 megawatts by 2035, to meet the country's ambitious renewable energy targets.

How to manage solid waste challenges in Bahrain?

To better manage solid waste challenges, Bahrain's Ministry of Works is currently overseeing a project implemented by an international consultancy to analyze and determine waste materials available for recycling, conversion to agricultural products, or electricity production through incineration at the Askar landfill.

## Bahrain energy storage new energy project

### [Bahrain moves to expand both hydrocarbons and renewable ...](#)

Oil was first discovered in Bahrain in 1932, making it the oldest oil-producing market in the Gulf region. After several years of stasis due to the Covid-19 pandemic, the kingdom's ...
