

Botswana energy storage pack fire extinguishing equipment

Overview

What is fire extinguishing agent immersion suppression?

However, the area of fire extinguishing agent attached to the battery surface is small, and the cooling effect is insufficient. Fire extinguishing agent immersion suppression is also a new method of battery thermal runaway suppression. The battery module is immersed in some media (silicone oil, HFE_7100 and water) .

Which fire extinguishing agents are used for battery fires?

Based on the understanding of fire extinguishing mechanism, new fire extinguishing agents have been developed for battery fires, such as hydrogel fire extinguishing agents and liquid nitrogen fire extinguishing agents.

How to improve the cooling effect of fire extinguishing agent?

At the same time, to improve the utilization efficiency of the fire extinguishing agent and enhance the cooling effect, Zhang et al. proposed an intermittent spray method for battery TR cooling. As the duty cycle decreases, the cooling effect increases first and then decreases.
