

Brasilia energy storage power station transaction

Overview

The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid.

The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid.

The auction aims to boost Brazil's grid reliability by integrating energy storage for wind and solar power. Brazil is set to conduct its first auction for adding batteries and storage systems to the national power grid. The auction, to take place in June 2025, will include 300MW energy capacity.

Brazil is taking another decisive step toward integrating large-scale battery energy storage systems (BESS) into its power market. The Ministry of Mines and Energy (MME) has opened a 20-day public consultation on the framework for the country's first major capacity auction dedicated to energy.

Brazil's planned electricity auctions in 2025 could drive between R\$47 billion and R\$57 billion in investments, according to a study by the Energy Research Company (EPE), an agency linked to the Ministry of Mines and Energy (MME), commissioned by Valor. The estimate includes R\$45 billion to R\$50.

The inclusion of storage in Brazil's renewable energy tax reductions on renewable energy projects, as well as the legal provision for storage's participation in auction are positive signs for the attraction of investments to Brazilian BESS. However, the industry has concerns around the allocation.

Brazil's Ministry of Mines and Energy is looking to launch its first battery storage auction. Initially postponed from June to the second half of 2025, and with a date not yet set, it is looking increasingly likely that it will be carried out in 2026. The announcement marks the first time Brazil.

The consultation refers to the draft ordinance establishing the guidelines and procedures for conducting the Capacity Reserve Auction in the form of Power through new battery energy storage systems ("2026 LRCAP - Storage"). The

consultation period will run from November 10 to December 1, 2025. The.
