

# Canberra energy storage power station project

## Overview

---

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal role in achieving the ACT's net-zero emissions target by 2045.

Scheduled to begin operations in 2026, the BESS will store enough renewable energy to power one-third of Canberra for two hours during peak demand, playing a pivotal role in achieving the ACT's net-zero emissions target by 2045.

The Australian Capital Territory (ACT) government and Eku Energy have commenced construction of the Williamsdale Battery Energy Storage System (BESS), a 250 MW/500 MWh project under the ACT Government's Big Canberra Battery initiative. Scheduled to begin operations in 2026, the BESS will store.

Australia's capital is stepping into the renewable energy spotlight with its ambitious Canberra energy storage reservoir project. Designed to tackle the intermittency of wind and solar power, this pumped hydro initiative could store enough electricity to power 200,000 homes for 8 hours—equivalent.
