ems (Standalone ESS) emerging as a key enabler. As the country rapidly scales up variable renewable energy (VRE), Standalone ESS offers a dispatchable solution to address the intermittency of renewables, su andalone ESS functions as an independent asset. Utilities, grid operators or third-party.

aintaining its position as the cheapest form – in terms of \$/kWh – of grid-scale energy storage. Of all countries here compared, costs are cheapest in India, which already hosts a large instal ed capacity of 4700 MW (the 7th largest in the world) with more projects in the pipeline (CEA 2022). It.

India's ambitious renewable energy targets (500 GW by 2030) necessitate energy storage solutions to manage the variable nature of solar and wind power. This creates a massive opportunity for grid-scale storage technologies. The government recognizes the importance of ESS and has taken proactive.

India's energy storage sector achieved a pivotal milestone in July 2024, with states tendering 8.1 GWh of capacity—the highest monthly volume on record—while discovering a benchmark tariff of ₹3.13 per unit for solar-plus-storage projects with four-hour duration. This represents an 18% reduction.

Solar and wind power supply fluctuates, Energy storage systems (ESS) play a

crucial role in smoothening out this intermittency and enabling a continuous supply of energy when needed. Thus, for sustainable renewable energy addition, concurrent growth of ESS capacity is imperative. This report. Is India a key market for grid-scale energy storage?

Since India will thus be a key market of grid-scale energy storage, this review aims to give a holistic picture of the global energy storage industry and provide some insights into India's growing investment and activity in the sector.

How can a utility-scale battery storage system be deployed in India?

The energy sector in India has several opportunities for deploying utility-scale battery storage systems: Policy Support: Administration initiatives such as the Viability Gap Funding (VGF) scheme offer capital support of up to 30% for energy storage projects.

How India is promoting the adoption of energy storage systems?

India has begun to invest in energy storage and develop policy to support the development of battery storage. The Ministry of Power in India has taken a significant step in promoting the adoption of energy storage systems (ESS) by introducing an Energy Storage Obligation (ESO) alongside the Renewable Purchase Obligation (RPO).
