When Panasonic developed 21700 cells for Tesla in 2017 (that's 21mm wide, 70mm tall for those keeping score), they weren't just creating bigger TV remote batteries. These energy storage workhorses now power: During the 2020 heatwave, Southern California Edison deployed a cylindrical battery farm.

Lithium-ion batteries are the power source of modern innovation—from electric vehicles and drones to medical devices and grid-scale energy systems. As battery adoption surges, so does the urgency of ensuring their safe storage and charging.

This is where the lithium ion battery cabinet becomes.
