

Cyprus energy storage project

Overview

The Cyprus Energy Regulatory Authority (CERA) has approved a major energy storage project totaling 120 megawatts (MW), aimed at improving grid stability and securing the island's electricity supply. The move marks a significant milestone in the modernization of Cyprus's energy.

The Cyprus Energy Regulatory Authority (CERA) has approved a major energy storage project totaling 120 megawatts (MW), aimed at improving grid stability and securing the island's electricity supply. The move marks a significant milestone in the modernization of Cyprus's energy.

"Energy storage represents not just a technical solution, but a strategic asset in our energy security framework," minister George Papanastasiou said at an event in March. Image: Cyprus government / MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage.

The energy regulator has approved a significant battery storage system totalling 120MW across three locations to enhance grid stability and security, marking a crucial step for the island's electricity infrastructure. The Cyprus Energy Regulatory Authority (CERA) on Wednesday granted approval to.

In May 2025, Cyprus successfully commissioned its first significant battery energy storage system (BESS), marking a major step toward enhancing the country's energy infrastructure and aligning with its national goals for renewable energy integration and grid optimization. Spearheaded by a.

Cyprus' Department of Environment has approved a project for what is set to become one of the country's first battery energy storage systems with HESS Hybrid Energy Storage Systems is planning to install a 59 MW facility with a capacity of 120 MWh. That will ease the strain on the European Union's.

The Apollon PV Park has commissioned a 3.3 MWh battery energy storage system (BESS) and solar project, in a milestone for Cyprus. From ESS News Cyprus has taken a step toward modernizing its energy infrastructure with the commissioning of a 3.3 MWh BESS as part of the Apollon PV Park. Operated by.

OUT&ABOUT VIDEOS NEWS. Does Cyprus have a battery energy storage system?

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System Operator (TSOC).

Will Cyprus install 400MWh battery energy storage system?

Image: Cyprus government / MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country.

How is Cyprus developing pumped hydro energy storage capacity?

The country is also seeking to develop pumped hydro energy storage (PHES) capacity with technical assistance from the European Commission (EC) and is formulating a National Hydrogen Strategy. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Is Cyprus facing a unique set of energy challenges?

In a keynote address to open a conference on energy storage and hydrogen in March, George Papanastasiou of the Ministry of Energy, Commerce and Industry (MECI) noted that Cyprus faces a "unique set of energy challenges, which require tailored solutions."
