

# Cyprus solar and energy storage rights

## Overview

---

Under the new legislation, solar PV, wind and biomass plants that receive FiTs up to EUR 166/MWh can claim capital expenditure (capex) for the purchase and installation of storage capacity up to EUR 100,000/MWh.

Under the new legislation, solar PV, wind and biomass plants that receive FiTs up to EUR 166/MWh can claim capital expenditure (capex) for the purchase and installation of storage capacity up to EUR 100,000/MWh.

Cyprus's cabinet has approved draft legislation allowing the national grid operator to develop electricity storage facilities, a move aimed at preventing waste of renewable energy during low-demand periods. The amendment to electricity market regulations, approved on February 12, follows successful.

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated.

Cyprus' Ministry of Energy, Commerce and Industry has launched a subsidy scheme for energy storage systems that can be added alongside existing renewable energy plants. Eligible renewable power plants should be remunerated either by feed-in tariffs (FiTs) or net billing systems. Cyprus has.

The House of Representatives has passed a legislative amendment to the Law on the Promotion and Encouragement of the Use of Renewable Energy Sources, bringing Cyprus renewable energy law into alignment with key European Union directives: Directive (EU) 2023/2413 and Directive (EU) 2024/1711. These.

After much anticipation, the Cyprus Parliament unanimously passed a pivotal law enabling the storage of electrical energy. This significant move, driven by persistent efforts from Energy Minister Giorgos Papanastasiou, brings Cyprus a step closer to energy stability. The new law grants the.

With over 300 sunny days a year, solar power has great potential in Cyprus. But the island must first improve its renewable energy supply and the efficiency of its energy market. Battery storage could help the country a lot. The Energy Ministry is

working on a "behind the meter" initiative that. Does Cyprus have a battery energy storage system?

Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country. Cyprus Energy Regulatory Authority (CERA) announced the approval earlier this week (18 June) of three projects which will be owned and operated by the Cyprus Transmission System Operator (TSOC).

Will Cyprus install 400MWh battery energy storage system?

Image: Cyprus government / MECI. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects in the Mediterranean island country.

How is Cyprus developing pumped hydro energy storage capacity?

The country is also seeking to develop pumped hydro energy storage (PHES) capacity with technical assistance from the European Commission (EC) and is formulating a National Hydrogen Strategy. Cyprus's electricity regulator has approved plans to install 400MWh of battery energy storage system (BESS) projects.

Is Cyprus facing a unique set of energy challenges?

In a keynote address to open a conference on energy storage and hydrogen in March, George Papanastasiou of the Ministry of Energy, Commerce and Industry (MECI) noted that Cyprus faces a "unique set of energy challenges, which require tailored solutions."
