

Cyprus solar system quote

Overview

Is Cyprus a good country for solar energy?

Sustainability – Clean, renewable energy directly from the sun. ☐ High solar potential – With over 320 days of sunshine per year, Cyprus is one of the best countries in Europe for solar energy. Which Solar Panels Are Best for You?

How much energy does a 10kW solar system generate in Cyprus?

A 10kW system with monocrystalline panels may generate around 16,000 kWh per year in Cyprus. The same 10kW system with HJT panels can generate 10–15% more energy annually – that’s up to 20,000 kWh per year. Over 25 years, this results in an additional 60,000+ kWh of free solar electricity, significantly reducing your electricity bills.

Why should you install solar panels in Cyprus?

Solar panels in Cyprus are the perfect solution: ☐ Lower Electricity Bills – Once installed, solar panels in Cyprus can reduce your dependence on the grid by up to 70–100%. ☐ Energy Independence – With rising electricity prices from EAC, solar energy gives you more control over your own energy supply.

What kind of solar panels do you offer in Cyprus?

JPB Energy offers two types of solar panels: Bifacial and non-Bifacial. Bifacial panels have the advantage of producing electricity from both sides. We recommend these panels. Please note that JPB Solar Energy Cyprus is limited to offering solar panels that cover up to 90% of your annual electricity consumption.
