

Data Center Racks in Five Central Asian Countries 1000V

Overview

How big is the Central Asia data center market?

In the Central Asia data center market, power capacity is expected to reach 21.60 MW by 2028. The Central Asia data center market investment is expected to reach USD 179.7 million by 2028 from USD 65.0 million in 2022, growing at a CAGR of 18.47%.

How will Asia's data center market grow over the next 5 years?

Rapid growth of Asia's data center market is expected over the next five years due to the region's expanding digital economy. AI workload increases are driving data center expansion in Southeast Asia while challenges in power availability are hindering new developments in key Asian cities.

How big is the Asia Pacific Data Center Market?

Large campuses still hold 31.03% share of the Asia Pacific Data Center market size, favored by global cloud tenants for economies of scale. Massive (>100 MW) hubs function as regional cores supporting AI training, while small facilities serve niche enterprise or remote-area requirements.

Which country has the fastest growth in Asia-Pacific Data Center Market?

By geography, China led with 34.58% Asia-Pacific Data Center market share in 2024, whereas India is on course for the quickest 20.50% CAGR to 2030. Widespread 5G adoption is reshaping workload-placement economics across the Asia Pacific Data Center market.
