

# Data center battery cabinet for virtual power plants 600mm deep

## Overview

---

What is a Vertiv EnergyCore Battery Cabinet?

Vertiv unveiled its innovative Vertiv EnergyCore battery cabinets to address the growing demand for solutions that support high-density computing in increasingly crowded data center environments.

How many Vertiv EnergyCore cabinets does a Liebert ® apm2 need?

The 250kW Vertiv Liebert APM2 requires just a single Vertiv EnergyCore cabinet, while the 500kW Liebert ® APM2 can be supported by two Vertiv EnergyCore battery cabinets at five minutes end of life.

How long do Vertiv EnergyCore cabinets last?

Vertiv EnergyCore cabinets are optimized for five minutes end-of-life runtime at 263kWb per each compact, 24" wide (600mm) cabinet, and operate across a wide temperature range, making them suitable for high-density environments.

Is artificial intelligence putting a premium on energy storage?

“The proliferation of artificial intelligence and other high-performance computing applications is putting a premium on the ability to deliver more power in smaller, hotter spaces,” said Milind Paranjape, Vice President of energy storage at Vertiv.
