The SUNSYS HES XL system is based on 2 standard cabinets – C-Cab, composed of a converter, an isolation transformer and a DC combiner, and B-Cab – that can be combined. The different systems with 500 kVA and 4 to 8 battery racks can then be installed in parallel to create multi-MegaWatt.

The Microgrid System comprising four Galaxy 261 cabinets and an MPS microgrid hybrid inverter, builds on the advantages of full-function integration by combining EMS, PCS, and BMS in a compact design with a minimal footprint. Its modular architecture and plug-and-play installation enable fast.

Therefore, this project plans to construct an on-grid/off-grid power supply system according to requirements of clients, which mainly consists of a photovoltaic (PV) system, a 500kW/1MWh LFP energy storage system, and a generator set. The hybrid energy storage system adopts integrated design, the.

Multiple cabinets can be combined to provide 2–4 hours of continuous power, ideal for industrial production, data centers, and critical facilities. Connect up to 2 FlexiO systems in parallel to scale power from 500 kW to 1 MW with total storage capacity of 3.8 MWh. Perfect for manufacturing plants.

We can supply according to your requirements, your email will be replied within 24 hours. The SFQ Micro Grid PV Storage Cabinet SCESS-T 500KW/1075KWH/A is a high-performance storage system that prioritizes safety and reliability. With its built-in fire protection system, uninterruptible power.

Outdoor energy storage cabinet integrates energy storage battery, modular Pcs, energy management monitoring system, power distribution system, environmental control system and fire control system. Adopting modularized pcs, it is easy to

maintain and expand capacity, and the outdoor cabineiadopts.
