

# Energy storage project tax payment

## Overview

---

- For projects beginning construction on or after Jan. 29, 2023 or where the maximum net output is 1 MW or greater, the base tax credit is 6% of the taxpayer's basis in the energy property or qualified facility (or energy storage technology).
- For projects beginning construction on or after Jan. 29, 2023 or where the maximum net output is 1 MW or greater, the base tax credit is 6% of the taxpayer's basis in the energy property or qualified facility (or energy storage technology).

Multiple tax incentives are available for the deployment of energy storage and solar resources in New York State . These tax incentives are provided by both New York State and the federal government . Two major tax incentives are discussed in this document, along with a discussion of accelerated.

This tax credit can help offset the costs associated with qualified energy property and facilities. How can a tax-exempt entity use these Investment Tax Credits (ITC)?

Eligible tax-exempt and governmental entities can claim the § 48 ITC and § 48E Clean Electricity ITC for qualified energy property.

This tax credit can help offset the costs associated with qualified energy property and facilities. How can a tax-exempt entity use these Investment Tax Credits (ITC)?

Eligible tax-exempt and governmental entities can claim the § 48 ITC and § 48E Clean Electricity ITC for qualified energy property.

Let's face it – tax reports are about as exciting as watching battery cells charge. But here's the kicker: Getting your energy storage power station tax payment report right could mean the difference between a profitable project and an IRS-shaped headache. This guide is for: Operators handling.
