

Export restrictions on energy storage cabinet

Overview

Do you need a license to export lithium ion batteries?

Specifically, exports of lithium-ion battery cells or packs with a weight energy density of 300 Wh/kg or higher will now require a license. In addition, specialized manufacturing equipment such as winding machines, lamination machines, liquid injection machines, and capacity cabinets are also listed as controlled items.

Can China halt exports if there are discrepancies?

Chinese customs authorities will have the power to delay or halt shipments if any discrepancies or uncertainties arise regarding the nature of the exported goods. This latest move builds on China's earlier export controls on natural graphite, lithium iron phosphate (LFP) cathode active material (CAM), and lithium processing technologies.

Are rotary kilns covered by the new export rules?

Equipment such as CVD rotary kilns, spray dryers, and box furnaces are also covered. Under the new rules, exporters of any listed items must apply for an export license from the Ministry of Commerce. All declarations must clearly state whether the items are controlled dual-use items or not.

Why has China introduced new export control measures?

The Chinese government has introduced new export controls on key dual-use items, citing national security concerns. The move opened a new chapter in the ongoing trade confrontations with the US. China has announced new export control measures targeting a wide range of lithium battery technologies, materials, and manufacturing equipment.
