

Fixed inverter cabinet type for highways

Overview

An enhanced version of the 334-style cabinet designed for ramp metering and other applications such as highway surveillance, CCTV, and CMS sign control.

An enhanced version of the 334-style cabinet designed for ramp metering and other applications such as highway surveillance, CCTV, and CMS sign control.

With BENNING's INVERTRONIC compact range of inverters, the company offers highly reliable, cost-effective, single-phase, modular inverter systems which provide high-quality, maximum-reliability electrical power to the critical loads. In combination with TEBECHOP modular rectifier systems, the.

334L Cabinets are enhanced versions of the 334-style cabinet designed for ramp metering and other applications such as highway surveillance, CCTV, and CMS sign control. Meeting all Caltrans and FHWA requirements, 334L Cabinets offer ample room for up to two controllers and other equipment. The.

The AFW11M G2, commonly referred to as "modular drive", was developed for mounting on a modular structure, and it is available to supply high output currents with the choice of specification according to the application needs. They are supplied in the versions with air-cooled heatsink (AFW11M) or.

OPUS Inverter Systems are robust, free convection cooled, N+1 redundant DC to AC power conversion solutions for critical infrastructure applications. Inverter systems can be integrated to OPUS Power System and monitored via VID1 controller. Inverter Cabinet systems are configured according to.

The NORDAC PRO is the inverter for all drive applications. It offers a wide power range, and its functionality can be extended with plug-in option modules. For this inverter, variable cooling concepts . The SINAMICS G130 & G150 built-in and cabinet units have proven themselves in industrial use.

NORD control cabinet inverters have a power range of up to 215 HP and thanks to their wide range of functionality can be perfectly adapted to many customer applications. NORD Frequency Inverters already meet the requirements of energy efficiency classification IE2 of the new Ecodesign directive.
