

Free consultation on 200kWh solar energy storage cabinets in Chile

Overview

Why is Chile pursuing energy storage in Antofagasta?

Chilean president Gabriel Boric (centre) at the inauguration of an energy storage plant in the northern region of Antofagasta in April 2024. Chile has strong conditions for wind and solar energy, and is pursuing storage to help overcome intermittent supply (Image: Ximena Navarro / Dirección de Prensa, Presidencia de la República de Chile).

How does a 220 MWdc solar facility benefit Chile?

Expanding solar energy capacity —the 220 MWdc solar facility contributes to Chile's growing solar power sector. The project maximizes Chile's natural solar resources. The 1 GWh battery storage system ensures a consistent energy supply to mitigate solar power intermittency.

How can technology help develop solar and storage projects in Chile?

Several technological innovation can help develop solar and storage projects in Chile. This includes AI, smart grids, and energy storage innovations. Chile generates over 60% of its electricity from renewable sources, with the Atacama Desert hosting some of the world's most powerful solar farms.

How many energy storage projects are in Chile?

Currently, 36 of the 129 large-scale projects Latin America projects with an energy storage component under development are in Chile, including 32 out of 71 of the region's early works projects. The storage technologies either in use or being considered include:
