

Honduras plans hybrid solar power station

Overview

This nationwide push includes landmark projects like the Nacaome II and Arenal solar parks, which, along with innovative hybrid systems, are set to increase the country's solar capacity by over 100 MW.

This nationwide push includes landmark projects like the Nacaome II and Arenal solar parks, which, along with innovative hybrid systems, are set to increase the country's solar capacity by over 100 MW.

Honduras is significantly boosting its solar energy production with the addition of new solar parks and hybrid projects, thereby enhancing its position as a leader in renewable energy in Central America. This nationwide push includes landmark projects like the Nacaome II and Arenal solar parks.

Mar 25, The National Electric Power Company (ENEE) has selected a Chinese-Honduran consortium to design, supply, install, test, and commission a grid-connected battery energy storage system (BESS) project. Six separate companies have submitted bids to build the 4-hour BESS project, and it will be implemented next year.

In 2021, Honduras' energy mix was led by oil, constituting 52.3% of the total energy supply, followed by biofuels and waste at 33.7%. Modern renewables, which exclude traditional biomass practices like burning wood or agricultural residues, accounted for 13.7%, while coal made up just 0.3%.

At Solarvance, we design solar energy systems optimized for Honduras's geography—from the coastal cities to highland villages. Whether you're planning a rural microgrid or a hybrid solution for a business, we're ready to help you bring clean, stable power to your project. Empower Honduras with.

The Honduran government and DanaSun Energy Honduras have signed an MoU to develop a 300 MW photovoltaic solar plant with 60 MW of storage in Choloma, Cortés. The initial phase will include 100 MW of solar capacity and 20 MW/80 MWh of storage, with operations expected to begin between March and.

This report presents the work conducted by the National Renewable Energy Laboratory (NREL) on the rural electrification of Honduras, focusing particularly on schools and clinics and extending to support broader community development

through productive uses of energy. The project was funded and.
