

# Hotel uses Canada outdoor energy storage cabinets with IP67 rating

## Overview

---

IP67 delivers total dust protection and allows temporary water immersion up to 1 meter for 30 minutes. This makes it perfect for outdoor ESS installations in areas with heavy rainfall or flood risk. Finally, IP68 represents the highest level of enclosure protection.

IP67 delivers total dust protection and allows temporary water immersion up to 1 meter for 30 minutes. This makes it perfect for outdoor ESS installations in areas with heavy rainfall or flood risk. Finally, IP68 represents the highest level of enclosure protection.

Introducing Guardian Outdoor, the compact 11 kWh solution for smaller-scale outdoor energy storage. Featuring advanced immersion cooling technology and proprietary BMS & EMS, it ensures superior safety, efficiency, and control. Built for durability with IP67-rated battery modules and IP54-rated.

The IP rating, defined by the IEC 60529 standard, specifies the level of protection provided by an electrical enclosure against the entry of solid particles and liquids. It consists of two numbers: The first digit indicates the protection level against dust and solid objects (ranging from 0 to 6).

Project features 5 units of HyperStrong's liquid-cooling outdoor cabinets in a 500kW/1164.8kWh energy storage power station. The "all-in-one" design integrates batteries, BMS, liquid cooling system, heat management system, fire protection system, and modular PCS into a safe, efficient, and flexible.

High density, capacity of 407 kWh with floor space of just 1.69 m<sup>2</sup>. Modular design with high energy density. Suitable for inverter voltage ranging 600 to 1500 volts, allowing for multiple applications. Adaptability to ambient temperature range of -30°C to +55°C. Resistance up to C5 corrosion level.

AZE's heavy duty outdoor battery enclosures and Lithium battery storage system are available in NEMA 3R, or 4X configurations. These outdoor battery enclosures, which come in all shapes and sizes, are designed to withstand extreme elements, climates and environments. With its scalable and.

Recent data from Frost & Sullivan reveals 42% of outdoor enclosure failures stem

from misunderstood ingress protection standards, costing industries \$2.3 billion annually in premature replacements. The IP (Ingress Protection) code, defined by IEC 60529, combines two digits: For outdoor cabinets.
