

# How much does 19 watt solar energy cost

## Overview

---

It'll cost you around \$23,825 after the federal tax credit. Some states, towns, and utility companies offer incentives that can help lower the cost of solar. Compare multiple offers and save up to 20%.

It'll cost you around \$23,825 after the federal tax credit. Some states, towns, and utility companies offer incentives that can help lower the cost of solar. Compare multiple offers and save up to 20%.

A 7.2 kW solar panel system costs \$21,816 before incentives or \$3.03 per watt of solar installed. The federal solar tax credit lowers solar system costs by \$6,544, bringing the price down to \$15,271. Using a solar loan makes solar panels more expensive! When you finance solar panels using a loan.

Thinking about going solar?

In New York, you'll need a 12.19 kW system to match the average electric bill. It'll cost you around \$23,825 after the federal tax credit. Some states, towns, and utility companies offer incentives that can help lower the cost of solar. Compare multiple offers and save.

Most homeowners spend between \$12,600 and \$33,376 to install a complete residential solar system in 2025, with the national average at \$19,873 before incentives. Your actual cost depends on your home's energy needs, roof characteristics, location and other factors, all of which we'll break down in.

As of 2026, the average cost of residential solar panels in the U.S. is between \$15,000 and \$25,000 before incentives. This typically translates to about \$2.50 to \$3.50 per watt of installed capacity (more on price per watt below). The total price depends on your system size, location, roof type.

Our estimator shows how many solar panels your home needs We generate an online cost and savings estimate You choose how many solar companies send you an exact price by email or text Click on your state for solar panels cost localized to your city or use the solar calculator above to see the live.

A 19kW solar system can generate 19 kilowatts of power under ideal conditions,

typically comprising around 48-64 solar panels depending on the efficiency and wattage of the panels used. As of 2024, the average cost of a 19kW solar system in the United States ranges from \$38,000 to \$52,000 before.

## How much does 19 watt solar energy cost

### [Home Solar Calculator: Get Panels Needed, Cost and Savings](#)
