How much does a 10kW IP54 outdoor enclosure cost for Australian farms

Overview

Are 10kW solar systems a good investment in Australia?

10kW solar systems are a great investment for Australian homes with high levels of electricity consumption or businesses with relatively small electricity needs. This article takes a look at 10kW solar system pricing, energy production and returns in Australia. How many panels & how much roof space for a 10kW solar system?

.

How long does a 10kW Solar System last in Australia?

The payback period for a 10kW solar system in Australia is typically 4-5 years. This depends on your self-consumption rate and solar feed-in tariff. A solar system can pay for itself faster if you consume more of the energy on-site (daytime usage), rather than exporting excess to the grid.

How much does a 10kW solar battery cost in Australia?

The upfront price of a 10kw solar battery in Australia typically ranges between $9,000 and $15,000 for the unit itself, before considering installation or potential government incentives1. When factoring in professional installation, the total cost often lands between $12,000 and $20,000.

How much does a 10kW Solar System cost in 2025?

You should get about $3,500 in STCs (AKA the solar rebate). So expect to pay about $8,500 – $13,000 out of pocket costs for a good quality 10kW solar system in 2025, professionally installed by a reputable installer. That's quite a price range – the reason is the cost of a 10kW solar system will depend on the type of components used.
