Overview

How much does a 5 kW solar panel cost?

The average cost of solar panel installation by a professional solar company is around \$2.95 per watt. For a typical 5 kW (5,000 watt) solar panel system, that works out to \$14,750. On the other hand, a 5 kW DIY solar panel kit costs between \$1.00–\$1.50 per watt.

What are solar energy cost benchmarks?

These benchmarks help measure progress toward goals for reducing solar electricity costs and guide SETO research and development programs. Read more to find out how these cost benchmarks are modeled and download the data and cost modeling program below.

How efficient is a residential PV system in 2024?

The representative residential PV system (RPV) for 2024 has a rating of 8 kW dc (the sum of the system's module ratings). Each module has an area (with frame) of 1.9 m² and a rated power of 400 watts, corresponding to an efficiency of 21.1%.

How much AC does a solar PV system produce?

The aluminum rails and module clamps are imported from China and subject to 25% tariff. Each module is paired with a microinverter rated at 330 W ac, giving the PV system a rated AC power output of 6.6 kW ac, which corresponds to an inverter loading ratio of 1.22.
