

# Huawei energy storage cabinet investment

## Overview

---

Does China's Data Centre building boom drive lithium demand?

The data centre building boom in China and globally has also driven growing power storage demand for lithium, said Jinyi Su, a Wuxi-based analyst at consultancy Fubao, adding that rapid growth in lithium demand from energy storage in the second half of 2025 has surpassed expectations.

Will energy storage be a game changer for lithium?

"Looking ahead, energy storage is likely to become a game changer for lithium, improving its fundamentals, but too high a price could undermine the economics of energy storage, keeping a lid on prices," Su said.

How many MW of data center capacity does Xiaomi have?

The company has a robust data center portfolio across the ASEAN region, including around 200MW of capacity in Singapore, 350MW across the rest of APAC (Australia, Japan, China, and Malaysia), in addition to a further 100MW of capacity in Europe.
