

Huawei invests in energy storage factory project

Overview

Will Huawei fusion solar power Red Sea city's off-grid energy needs?

Huawei's FusionSolar Smart String Energy Storage Solution will power the Red Sea City's off-grid, clean energy needs. The Red Sea Project, a key part of SaudiVision2030, is now the world's largest microgrid with 1.3GWh storage capacity.

Does Huawei's smart campus energy management solution save energy?

Huawei saved 1.4 million kWh of electricity in the second half of 2019 in Section B of its Bantian campus by deploying its Intelligent Campus Energy Management Solution. This represents a 30% reduction of consumption compared with 2018, and a total reduction of carbon emissions of about 1,150 tons.

How does Huawei's energy saving solution work?

Huawei's energy saving solution balances user experience and the energy consumption of networks through collaboration on multiple layers, including equipment, sites, networks, and services. This results in a shortened time-to-market (TTM) for carriers by more than 30%.

How can Huawei grow its business?

What's more, Huawei has significant opportunity to grow its business, by entering and dominating new markets (including technological ones like 5G and geographic ones like India or the US) and improving its brand perception, perhaps through the use of brick and mortar stores.
