

Industrial energy storage vehicle in gothenburg sweden

Overview

How will the Gothenburg battery factory benefit the environment?

In a unique collaboration between the city and the battery factory, purified wastewater from Gothenburg residents will be used for cooling during production. The heated water will then be reused in the district heating network, benefiting both the environment and the city's residents.

What's going on in Gothenburg?

Gothenburg is a hub for innovation and at the forefront of sustainable industry. Now a battery cluster is taking shape, characterised by something that has served the region well: collaboration. Near Volvo Car's production plant and new battery assembly factory in Torslanda, a gigafactory is under construction.

Will the Gigafactory in Gothenburg accelerate the shift to electrification?

"The gigafactory in Gothenburg will accelerate the shift to electrification, and will be one of the largest battery cell manufacturing plants in Europe. This is clearly the kind of impact we aimed for when we co-founded Northvolt.
