

Italian hydropower energy storage project

Overview

Italian energy supplier Edison SpA (BIT:EDNR) and local industrial group Webuild SpA (BIT:WBD) have agreed to enter into a pumped-storage hydro (PSH) partnership, targeting the deployment of at least 500 MW of new capacities by 2030. Tumut 3 power station, Snowy Mountains Scheme.

Italian energy supplier Edison SpA (BIT:EDNR) and local industrial group Webuild SpA (BIT:WBD) have agreed to enter into a pumped-storage hydro (PSH) partnership, targeting the deployment of at least 500 MW of new capacities by 2030. Tumut 3 power station, Snowy Mountains Scheme.

The two groups commit to developing together hydroelectric storage projects in the South of Italy owned by Edison. The goal: generating at least 500 MW in pumped energy by 2030, allowing the Italian supply chain of the hydroelectric sector grow to raise Italy's energy autonomy and economic.

Edison and Webuild have signed an agreement to develop pumped storage hydropower projects in southern Italy. The goal is to develop at least 500MW of pumped storage hydropower by 2030, boosting Italy's energy autonomy and economic development. The partnership will focus on two pumped storage.

According to analyses conducted by Ispi based on Terna data (the company that manages the country's power grid), in 2023, 27.7 TWh of energy was produced from hydroelectric plants (approximately 10% of the total energy produced in Italy in a year), slightly less than the 29.7 in 2022, but.

Edison and Webuild have signed a programmatic agreement for the development of two hydroelectric pumping (or pumped storage) projects, which Webuild said are "highly strategic infrastructures for the ecological transition and national energy security." Under the agreement, Edison and Webuild will.

Edison and Webuild aim to develop 500 MW of hydroelectric storage capacity by 2030, investing 1.2 billion euros in southern Italy. The partnership focuses on upgrading Edison's hydroelectric plants and building storage projects in Basilicata and Sicily. Italy targets 10 GW of new energy storage by.

That's exactly what's happening with water energy storage projects in Italy, where

engineers are turning topography into terawatt-hours. But why should you care?

Well, if you've ever cursed at a blackout during Azzurri football match or wondered how Europe's pasta capital plans to ditch fossil.
