

# Italian portable off-grid power communication bess

## Overview

---

What role will Bess play in Italy's future energy landscape?

MP: BESS will play a critical role in stabilizing Italy's future energy landscape. As more renewable energy sources are integrated into the national grid, BESS will ensure that we meet Italy's climate targets. By 2030, we expect BESS to be indispensable for optimizing energy use and providing a reliable, sustainable energy system.

How important are Bess in Italy's energy transition?

MP: BESS are becoming increasingly vital in Italy's energy transition. With the ambitious targets outlined in the National Energy and Climate Plan (NECP), including reducing carbon emissions and increasing renewable energy to 30% of final energy consumption by 2030, BESS are essential.

What is a Bess project in Italy?

54.4 MW BESS in Santeramo in Colle, Apulia - awarded to Jupiter Srl, this project adds crucial storage capacity in one of Italy's sunniest regions, rich in solar PV resources. 50 MW "Stornara" BESS in Foggia, Apulia - developed by Atlas Storage 5 Srl, the project reinforces the southern grid's capacity to absorb excess renewable production.

Are mobile Bess applications compatible with smart grid applications?

The analysis is performed by a literature review of typical mobile BESS applications with the identified corresponding communication interfaces. Among the identified interfaces is the IEC 61850 standard, which shows suitability in smart grid applications, enabling interoperability, vendor-independence, and standardization.
