

Jerusalem inverter cabinet m-series

Overview

How many inverters can A M system support?

The M System offers unmatched flexibility with its modular construction, allowing configuration from a single 5.3 MVA inverter block to 10 independent 537 kVA inverters.

Which Inverter should I Choose?

Whatever your inverter need, it can be met by the M system. M is optimized for PV and for BESS. It's built in the USA with silicon carbide technology and boasts >99% efficiency. Smaller, faster, and cheaper, M is optimized for solar. It has no liquid cooling, higher efficiency, and smaller building blocks which future-proof the design.

Why is m a good choice for a central inverter?

M provides the most flexibility in the industry for central inverters, built-in spare capabilities, lower install costs, lower shipping costs, and infinite production capacity.
