

Kyrgyzstan government energy storage project

Overview

Kyrgyzstan's Presidential Administration signed an MoU with three Chinese energy storage companies to advance modern energy storage technologies, support renewable energy integration, and pilot a 100 kW solar-powered storage unit.

Kyrgyzstan's Presidential Administration signed an MoU with three Chinese energy storage companies to advance modern energy storage technologies, support renewable energy integration, and pilot a 100 kW solar-powered storage unit.

The Presidential Administration of Kyrgyzstan hosted the signing of a Memorandum of Understanding (MoU) aimed at developing modern energy storage systems, marking a step forward in the country's transition to renewable energy. The ceremony was attended by First Deputy Chairman of the Cabinet of.

In a significant move towards sustainable energy, Kyrgyzstan has launched a pilot project focusing on energy storage, funded by the Global Environment Facility and implemented by the UN Development Programme. This initiative is part of a broader national strategy to modernize its aging grid and.

The implementation agreement was signed between the Ministry of Energy of the Kyrgyz Republic and GIZ on 15 November, during the COP29 conference in Baku, Azerbaijan. The project will be implemented on behalf of the German Government in all Central Asian countries until 2027. Its goal is to improve.

The Ministry of Energy of Kyrgyzstan signed a Memorandum of Understanding with three international companies—global leaders in the supply, installation, and assembly of energy storage systems. The document aims to develop modern electricity storage technologies, increase the sustainability of the.

According to the press service of the Cabinet of Ministers, on December 13, 2025, a Memorandum of Understanding was signed in Bishkek between the Ministry of Energy of the Kyrgyz Republic and three international companies engaged in the supply, installation, and assembly of energy storage systems.

of energy sector GHG emissions. Thus, decarbonizing the Kyrgyzstan energy sector is crucial to achieving the country's ambitious carbon emissions reduction 8% being composed of hydropower. Whilst fossil fuel consumption is primarily

attributed to transport and heating, 85% of electricity is.
