

Laayoune passenger transport new energy solar station

Overview

The project, first of its kind in Africa, will enable the North African Kingdom to generate carbon-free electricity using green hydrogen instead of heavy fuel oils.

The project, first of its kind in Africa, will enable the North African Kingdom to generate carbon-free electricity using green hydrogen instead of heavy fuel oils.

Laâyoune, the vibrant capital of Morocco's southern provinces, is a city on the cusp of transformation. Nestled in the heart of the Sahara, this desert jewel is witnessing a surge of infrastructure projects in 2025 that promise to reshape its economic, social, and cultural landscape. From iconic.

awatts (MW) Laâyoune Thermal Power Plant, currently fueled by heavy oil fuel to hydrogen. As a first step, the collaboration will focus on the gas turbine to be converted to 100 percent hydrogen. The study is expected to be completed in two years and consists of exploring an integrated solution that.

GE Vernova will help Laayoune Power Plant deliver electricity generated using 100 percent green hydrogen produced at Nareva's Laayoune wind farm to support Morocco's expansion of renewable installed capacity from its current share of 40% to of 52% by 2030. GE Vernova's Gas Power business (NYSE:.

Global Solar Power Tracker, a Global Energy Monitor project. Noor Laayoune solar farm (محطة الطاقة الشمسية للعيون نور محطة 1) is an operating solar photovoltaic (PV) farm in Dcheira, Cercle de Laâyoune دائرة العيون, Laayoune Province, Western Sahara. Read more about Solar capacity ratings.

Morocco's National Office of Electricity & Drinking Water (ONEE) has partnered with GE Vernova's Gas Power business and Nareva to decarbonize Laâyoune Power Plant, which is powered by three GE Vernova 6B heavy-duty gas turbines. The project, first of its kind in Africa, will enable the North.

- GE Vernova will help Laâyoune Power Plant deliver electricity generated using 100 percent green hydrogen produced at Nareva's Laâyoune wind farm to support Morocco's expansion of renewable installed capacity from its current share of 40% to of 52% by 2030. GE Vernova's Gas Power business (NYSE:.

What is the Noor Laâyoune solar complex?

The Noor Laâyoune Solar Complex, part of Morocco's ambitious Noor solar program, is expanding in 2025 to increase its capacity. This project aligns with Morocco's goal to generate 52% of its energy from renewables by 2030. The complex uses concentrated solar power (CSP) technology, harnessing the Sahara's abundant sunlight to produce clean energy.

How will the port of Laâyoune improve in 2025?

In 2025, the Port of Laâyoune is undergoing upgrades to handle increased cargo and support the fishing industry, a cornerstone of the local economy. These improvements include deeper berths, modernized facilities, and enhanced logistics systems to streamline exports of fish and phosphate, a key resource in the region.

What are the most ambitious projects in Laâyoune?

One of the most ambitious projects in Laâyoune is the construction of the Mohammed VI Polytechnic University (UM6P) campus as part of the Fom El Oued Technopole. Launched in 2025, this 600-hectare development, with an investment of nearly 2 billion dirhams, is a game-changer for education and innovation in the region.

Why is the port of Laâyoune important?

Laâyoune's strategic location near the Atlantic coast makes its port a vital asset for trade. In 2025, the Port of Laâyoune is undergoing upgrades to handle increased cargo and support the fishing industry, a cornerstone of the local economy.
