

Laos new outdoor solar power hub field

Overview

Oudomxay Province on 13 December officially inaugurated a 1,000-megawatt solar power project, marking one of Laos' largest renewable energy developments to date. The facility was developed by CGN Energy Technology (Laos) Co., Ltd. in partnership with the Lao government.

Oudomxay Province on 13 December officially inaugurated a 1,000-megawatt solar power project, marking one of Laos' largest renewable energy developments to date. The facility was developed by CGN Energy Technology (Laos) Co., Ltd. in partnership with the Lao government.

In a significant stride for renewable energy in Southeast Asia, Northern Laos officially launched its largest solar power project on December 13. This landmark initiative represents a major boost to the region's green energy capacity and underscores the growing momentum behind utility-scale solar.

Laos launched a 1,000 MW solar power facility in Oudomxay Province, one of the country's largest renewable energy projects. (Photo credit: CGN Energy Laos) Oudomxay Province on 13 December officially inaugurated a 1,000-megawatt solar power project, marking one of Laos' largest renewable energy.

The Northern Laos Interconnected Clean Energy Base Project, developed by CGN, is a key supporting power project for China-Laos power interconnection. Located in the northern provinces of Oudomxay, Luang Namtha, and Phongsaly, the project is designed to create a comprehensive clean energy base.

In a determined push to secure energy stability, Laos is intensifying efforts to expand its electricity infrastructure through ambitious hydropower and solar projects. Electricite du Laos (EDL), the state-owned power corporation, has unveiled plans to launch new energy initiatives and upgrade the.

The first phase of the 1-million kilowatt photovoltaic project at China General Nuclear Power Group (CGN) clean energy base in northern Laos officially commenced on Wednesday, local time.
