

# Lithium energy storage power supply price in south america

## Overview

---

LFP cell prices declined to USD 115/kWh in 2024, representing a 17% year-over-year decrease, which drove levelized storage costs below USD 150/MWh for 4-hour systems.

LFP cell prices declined to USD 115/kWh in 2024, representing a 17% year-over-year decrease, which drove levelized storage costs below USD 150/MWh for 4-hour systems.

Over the past two years, South America's new energy storage market has seen a price reduction of 43% for lithium-ion battery systems. This isn't just good news—it's a game-changer for renewable energy adoption across the continent. But how did we get here, and what does it mean for solar and wind.

Let's break down the latest trends in South America pack energy storage battery prices without putting you to sleep with spreadsheet talk. Chile, Argentina, and Bolivia - aka the "Lithium Saudi Arabia" - control 58% of global lithium reserves (USGS 2023). But here's the kicker: local battery prices.

The South America Battery Energy Storage System Market size is estimated at USD 2.82 billion in 2025, and is expected to reach USD 5.85 billion by 2030, at a CAGR of 15.71% during the forecast period (2025-2030). Momentum stems from rising variable-renewable penetration, supportive auction programs.

Lithium-ion batteries are expected to dominate the technology segment due to their higher energy density and longer lifespan compared to lead-acid batteries. However, the lead-acid battery segment will continue to hold a substantial share, especially in applications requiring lower cost solutions.

The South America Lithium Ion Battery Market is experiencing rapid expansion due to rising adoption of electric mobility, portable electronics, and renewable energy storage. Increasing investments in gigafactories and local battery manufacturing are strengthening supply chain capabilities in South.

## Lithium energy storage power supply price in south america

### [S& P Global Commodity Insights' Platts Launches ...](#)

The Lithium Triangle, encompassing parts of Argentina, Bolivia, and Chile, is pivotal for lithium production, boasting significant ...
