## Overview

---

The World Bank will invest in a huge 4GW, 5.12GWh solar-plus-storage complex in Malaysia, which will form part of a pan-Southeast Asian power grid initiative. The Southern Johor Renewable Energy Corridor (SJREC) will be a roughly 2,000sqKm area dedicated to solar PV and energy.

On December 1, the World Bank announced a \$6 billion investment to develop the South Johor Renewable Energy Corridor project in Malaysia. The project, with a capacity of 4 GW/5.12 GWh, is being advanced by the International Finance Corporation, Johor's investment agency PDT, and local energy.

The World Bank has given its backing to a monumental 4 GW solar and storage project in Malaysia, a move set to redefine the nation's energy landscape. This ambitious initiative, known as the Southern Johor Renewable Energy Corridor (SJREC), aims to dramatically enhance the country's renewable.

Malaysia is rapidly expanding solar and other intermittent renewable generation, creating strong momentum for energy storage. The country's first four large-scale grid-connected storage projects have attracted significant interest, with more than 20 companies submitting over 30 proposals. Bidders.
