

Nauru retrofits solar air conditioner

Overview

How much does a solar air conditioner cost?

It's an air conditioner powered by energy harvested from the sun. It is sustainable, and with every year that passes, solar energy becomes more affordable. Current cost averages \$2.50 to \$3.00 per watt. A 6,000 watt system costs about \$15,000 to \$18,000 for panels, battery, inverter and wiring.

What is a solar powered air conditioner?

AC solar powered air conditioners are also called inverter air conditioners. An inverter must be used with these systems to convert DC current to AC current. Batteries can be used in AC systems to store excess sun energy. Your other option, if you are on the grid, is to tie the panels into your electrical panel.

How does a solar powered air conditioner work?

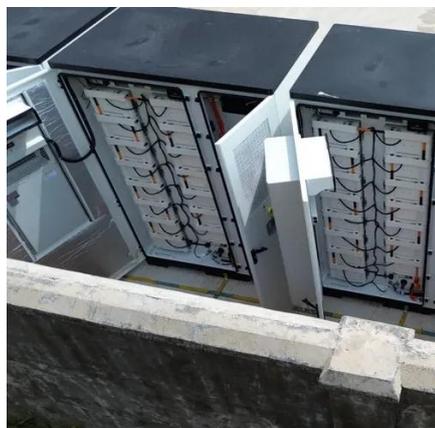

The solar panels collect the sunlight and convert it into electricity. The electricity will run the AC or charge batteries that can be used later. A solar powered air conditioner is using a modern air conditioning system with renewable energy technology for a cheaper and less impactful way of cooling.

How much does a solar AC retrofit cost?

With the 30% federal tax credit and many state rebates, a solar-AC retrofit often pencils out as the most cost-effective HVAC upgrade you can tackle, especially in hot, sunny regions where peak rates bite. SRECs or PV rebates: \$0.20-\$0.75/W in NJ, MA, IL, CO. Battery rebates: \$300-\$1 000/kWh in CA, NY, HI.

Nauru retrofits solar air conditioner

Nauru

Nauru is the world's smallest island nation, covering just 21 square kilometers (8.1 square miles), the smallest independent republic, and the only republic in the world without an official capital.

[Van Conversion Air Cooler](#)

We often see traditional air conditioning units demand high power whilst running on refrigerant. Our 12V Van Conversion Air Cooler can be powered through the vehicle's existing battery or ...
