

New Zealand Communication Cabinet 47U for Charging Stations

Overview

Are public charging stations safe in New Zealand?

All public charging stations should be either Mode 3 or 4 and must comply with the relevant safety standard. They should also have the recommended connectors. Before purchasing a charging station (and other electric vehicle supply equipment (EVSE)) you should assure yourself that the product is suitable for use in New Zealand.

Which modes are suitable for public charging infrastructure in New Zealand?

Only Mode 3 and Mode 4 are suitable for public charging infrastructure in New Zealand. The modes are outlined below: The electric vehicle is connected to the AC supply network (mains) using a standardised single-phase or three-phase socket outlet. Single-phase and three-phase socket outlets must not exceed 32A or 250 V AC.

How do I find public charging stations in New Zealand?

You can locate public charging stations using apps like PlugShare, ChargeNet, or the New Zealand Transport Agency's EV Roam tool. These apps provide real-time data on station locations, charger types, availability, and sometimes even the cost of charging. They often include navigation features to help you find the nearest station quickly.

How many charging stations are there in New Zealand?

New Zealand has developed an extensive public charging network with over 1,000 charging stations strategically located across both North and South Islands.
