

New energy storage in rotterdam bay netherlands

Overview

Is Rotterdam reshaping energy?

Few places in Europe bring industry, innovation and energy transition together quite like Rotterdam. With Europe's largest port, world-class research institutions and a thriving startup scene, the city is where bold ideas become real-world energy solutions. Meet the scaleups reshaping energy.

What is the future of energy in Rotterdam?

Established industry leaders are investing in sustainable fuels, hydrogen and carbon capture. Finally, startups and scaleups, supported by hubs such as CIC Rotterdam, BlueCity, and Up!Rotterdam, bring fresh ideas and speed to the transition. Together, they form a living laboratory where the future of energy takes shape.

What is Rotterdam's energy ecosystem?

From floating solar and AI-driven heat networks to battery sharing and rooftop wind, and discover how they are changing the way we produce, store and use power. Rotterdam's energy ecosystem is driven by the strengths of its players working together. The Port of Rotterdam provides scale and infrastructure to test and deploy new energy solutions.

Is a hydrogen system being built in Rotterdam?

A hydrogen system is under construction in the port of Rotterdam, combining production and use primarily in industry, as well as the import and transit of hydrogen to other parts of Northwest Europe. Despite challenges posed by increased costs and economic uncertainties, the system is steadily taking shape.
