

North macedonia installs solar air conditioner

**LPR Series 19'
Rack Mounted**

Overview

Can North Macedonia develop solar energy?

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for growth.

Is Macedonia a leader in the Western Balkans' energy transition?

North Macedonia has accelerated its shift towards renewable energy in recent years, emerging as a regional leader in the Western Balkans' energy transition¹. By 2023, renewables accounted for 50% of the country's installed power capacity and above.

Should North Macedonia accelerate the transition to renewables?

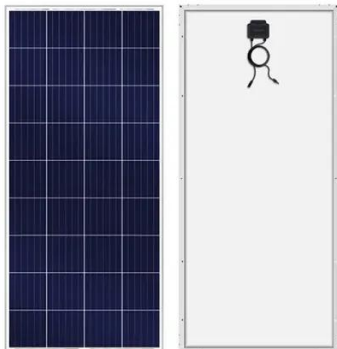

Like others in the region, North Macedonia must balance its need to rapidly accelerate the transition to renewables to secure its energy future with the need to ensure that future is one where both the country's nature and people thrive.

What is wind power in North Macedonia?

Wind energy in North Macedonia is at an earlier stage but is poised for expansion. The country's first wind farm, the 36.8 MW Bogdanci Park (1 turbines), was built by ESM in 2014¹⁵. For nearly a decade, Bogdanci remained the sole wind project—wind cap
