

Off-grid power cabinets for hotels in the 10 ASEAN countries

Overview

What is the ASEAN Power Grid?

The ASEAN Power Grid was initiated to enable higher renewable energy (RE) integration through power trading among the countries. According to the 8th ASEAN Energy Outlook, it is projected that the RE share in Total Primary Energy Supply (TPES) may reach 38.1% by 2050 (AMS Targets Scenario/ATS).

Should ASEAN have a regional grid?

Without action, the region could face power shortages, higher electricity costs, and increased dependence on fossil fuels. Given that some ASEAN countries have surplus energy while others face shortages, a regional grid would enable efficient power sharing ensuring a more reliable and balanced energy supply.

What is the ASEAN Power Grid updates 2025?

Summary The ASEAN Power Grid (APG) Updates 2025 presents the latest updates and comprehensive overview of ASEAN's key developments and achievements on power interconnection. It covers APG capacity, APG impacts, and ASEAN power trading progress.

Does ADB support the ASEAN Power Grid?

ADB is uniquely positioned to support the ASEAN Power Grid. The ASEAN power grid will improve energy security, strengthen resilience of the overall energy system, and promote the region's decarbonization. Delivering the ASEAN Power Grid is a complex, long-term task that requires strong and strategic partnerships.
