

Penang solar garden malaysia

Overview

Where can a floating solar farm be built in Penang?

State infrastructure, transport and digital committee chairman Zairil Khir Johari said areas such as the Teluk Bahang and Mengkuang dams were potential locations for the floating solar farms. (Bernama pic) The Penang government plans to develop floating solar projects in line with its efforts to achieve a target of 10% renewable energy by 2030.

Can solar panels be installed on water bodies in Penang?

The state Infrastructure, Transport, and Digital Committee chairman said that due to Penang's limited and high-value land, installing solar panels on water bodies could be a more practical alternative.

Why is Penang implementing floating solar projects?

The Penang government is assessing several strategic locations, including dams and coastal water bodies, to implement floating solar projects as part of efforts to strengthen its Renewable Energy (RE) sources. — NSTP/GHAZALI KORI Get breaking news fast — follow us on WhatsApp and Telegram.

Could a solar farm float on Penang's Harbour?

The Star has learnt that this entails creating a solar farm that floats on a sheltered quarter of Penang's harbour stretching over 4ha, the size of three World Cup football fields. On a sunny day, it is expected to churn out 30 megawatts of electricity, which theoretically will be enough for 6,000 homes.
