

Port moresby power station features

Overview

It was finally inaugurated by Prime Minister James Marape on 6 December 2019. [1][2] The power plant has six generation units with a total installed capacity of 58 MW. [1][3] The power plant was constructed by Wärtsilä with a cost of US\$100 million. [4].

It was finally inaugurated by Prime Minister James Marape on 6 December 2019. [1][2] The power plant has six generation units with a total installed capacity of 58 MW. [1][3] The power plant was constructed by Wärtsilä with a cost of US\$100 million. [4].

The Port Moresby Power Station is a gas-fired power plant in Kairuku-Hiri District, Central Province, Papua New Guinea. The construction groundbreaking ceremony happened in August 2017. In December 2017, land clearing, preparation, grading and compaction for the site office area were done. In.

The 58MW Port Moresby Power Station is PNG's first dedicated grid-connected gas-fired power plant and is located in the Hiri West of Port Moresby near the PNG LNG project plant site. Development of the power station commenced in August 2017 and it is owned and operated by Independent Power Producer.

Port Moresby power station is an operating power station of at least 60-megawatts (MW) in Port Moresby, Papua New Guinea. The map below shows the exact location of the power station. Loading map. Unit-level coordinates (WGS 84): CHP is an abbreviation for Combined Heat and Power. It is a.

To eliminate the use of high-pollution diesel fuel for electrical generation, NiuPower, a partnership between Oil Search Ltd. and Kumul Petroleum Holdings, sought to create Papua New Guinea's first utility-scale natural gas power plant. The Port Moresby (POM) Power Station uses natural gas to run.

The power station is the first-ever utility-scale gas engine project in the country. The facility, developed by NiuPower, a partnership between Oil Search and Kumul Petroleum, uses natural gas supplied by the PNG LNG project to feed six gas engines and generators. It has the capacity to produce.

The Port Moresby Power Station will provide reliable power to Port Moresby and is

the lowest cost dedicated grid connected thermal generation in the country.
Replacing heavy fuel oil and diesel, the gas-fired power plant also brings a material reduction in the environmental impact from power.
