

Portable high temperature resistant mobile power supply

Overview

What is a mobile temporary power supply device?

The Mobile Temporary Power Supply Device features a fully enclosed structure with a high protection rating, ensuring reliable safety. It comes with a built-in base, making installation convenient and unaffected by seasonal changes, allowing construction even in winter.

What types of power supplies are available?

The High Temperature X-ray HVPS, the 100kV Neutron Generator HVPS, the 2kV PMT power supply, the 100V Ultrasonic Transducer power supply and the High Temperature Multiple-Output Low Voltage DC Converters are just a few of the options available. However, we customize products to fit any applications you require and deliver them in a timely fashion.

How hot can a high temperature power supply withstand?

We qualify and derate our high temperature components significantly for the application. Our standard and custom high temperature power supplies range from 2.5V up to 150kV and, in some instances, they can withstand temperatures of up to 225°C.

Who is American high voltage?

American High Voltage specializes in high temperature DC converters and power supplies for clients in a wide range of industries. We're a worldwide leader in custom-designed high temperature power supplies and DC converters and produce a number of standard and custom products to stand up to harsh environments with extreme temperatures.
