

Saudi arabia vanadium liquid flow energy storage project

Overview

Saudi Arabian Oil Co. (Saudi Aramco) achieved a global milestone by successfully commissioning a megawatt (MW)-scale renewable energy storage system for gas production, using for the first time an iron-vanadium redox flow battery as a backup for solar-assisted power for gas well.

Saudi Arabian Oil Co. (Saudi Aramco) achieved a global milestone by successfully commissioning a megawatt (MW)-scale renewable energy storage system for gas production, using for the first time an iron-vanadium redox flow battery as a backup for solar-assisted power for gas well.

Aramco, one of the world's leading integrated energy and chemicals companies, has achieved a world-first by successfully commissioning a megawatt (MW)-scale renewable energy storage system to power gas production activities. It is the first deployment globally of an Iron-Vanadium (Fe/V) flow.

Dhahran, May 22, 2025, SPA -- Saudi Aramco has achieved a world-first milestone by successfully operating a megawatt-scale renewable energy storage system to support gas production operations. This marks the first global use of an iron-vanadium flow battery as a solar energy backup for gas well.

First-of-its-kind deployment: Aramco is the first company to commission a megawatt-scale Iron-Vanadium flow battery for renewable energy storage in gas operations. Strategic emissions reduction: The technology supports Aramco's goal of achieving net-zero Scope 1 and 2 emissions across wholly owned.

Dubai: Saudi Aramco, a global leader in energy and chemicals, made a historic stride in renewable energy innovation by commissioning the world's first megawatt-scale Iron-Vanadium (Fe/V) flow battery. The system, designed to power gas production activities, marks a significant step toward more.

Saudi Arabian Oil Co. (Saudi Aramco) achieved a global milestone by successfully commissioning a megawatt (MW)-scale renewable energy storage system for gas production, using for the first time an iron-vanadium redox flow battery as a backup for solar-assisted power for gas well operations. In a.

Aramco, one of the world's leading integrated energy and chemicals companies,

has achieved a world first by successfully commissioning a megawatt (MW)-scale renewable energy storage system to power gas production activities. It is the first deployment globally of an iron-vanadium (Fe/V) flow.
