

Serbia wind and solar energy storage project

Overview

This hybrid solar and storage project represents a strategic investment aimed at enhancing grid reliability, integrating renewable energy, and reducing dependence on fossil fuels. Once operational, it will play a critical role in supporting Serbia's energy transition and.

This hybrid solar and storage project represents a strategic investment aimed at enhancing grid reliability, integrating renewable energy, and reducing dependence on fossil fuels. Once operational, it will play a critical role in supporting Serbia's energy transition and.

One of Serbia's largest solar projects is moving from planning to implementation, as contracts signed in early 2026 have paved the way for construction near Sremska Mitrovica. The Noćaj 1 project has formally entered its build-out stage following the conclusion of a comprehensive EPC agreement.

At the beginning of 2026, the Noćaj 1 solar power plant project near Sremska Mitrovica officially entered the phase of concrete implementation, following the signing of an EPC contract for the construction of one of the largest solar power plants in Serbia. The information was published in an.

Serbia is set to host one of the largest integrated solar and battery storage projects in Southeast Europe, marking another milestone in the region's renewable energy expansion. Source: FortisEnergy Turkish developer Fortis Energy has secured a construction permit for a 270 MWp solar power plant.

Serbia plans to produce 45% of its electricity from renewable energy sources by 2030 to align with European regulations and advance decarbonization, according to the Integrated National Climate and Energy Plan (INEKP) adopted by the government last year. Currently, Serbia has 11 operational wind.

Fortis Energy is reinforcing its presence in Southeast Europe's renewable energy market with the development of the 110 MWp Erdevik Solar Power Plant, featuring an integrated 31.2 MWh Battery Energy Storage System (BESS) in Šid, Serbia. This hybrid solar and storage project represents a strategic.

Now there are plans in place for UGT Renewables and Hyundai Engineering to

provide a series of self-balanced utility-scale solar projects bringing reliable, renewable energy to every corner of Serbia. Delivering the utmost flexibility to the Serbian government, the Large-Scale Solar and Battery.

Serbia wind and solar energy storage project

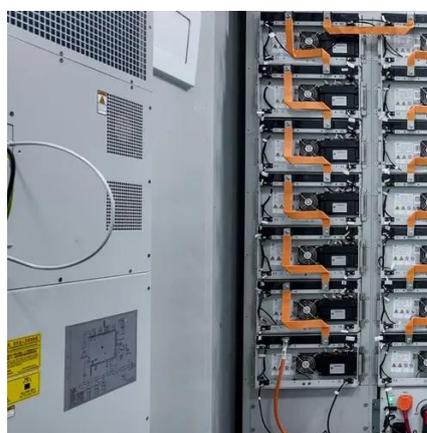

[Serbia opens public review for 350-MW wind-solar ...](#)

Renewables developer CWP Europe intends to build a hybrid wind-solar park in Serbia to add 350 MW of total power generation ...

[Serbia's EPS plans to build 500 MW of wind farms with strategic ...](#)

State-owned power utility Elektroprivreda Srbije (EPS) and the Government of Serbia plan to develop a 500 MW wind farm project with a strategic partner, according to ...

[Fortis Energy Launches 110 MWp Solar + Storage Project in Serbia](#)

This hybrid solar and storage project represents a strategic investment aimed at enhancing grid reliability, integrating renewable energy, and reducing dependence on fossil ...
