That's like building over 600 giant coal plants—but clean! As wind and solar farms explode across fields and rooftops, there's a quiet hero behind this revolution: custom electrical cabinets. Think of them as the “brain and nervous system” of renewable projects. Without these specialized boxes.

One cabinet per site is sufficient thanks to ultra-high energy density and efficiency. The eMIMO architecture supports multiple input (grid, PV, genset) and output (12/24/48/57 V DC, 24/36/220 V AC) modes, integrating multiple energy sources into one. Intelligent power generation: intelligent peak.

Pictured above is an 800W free-standing solar power system for an oilfield services client. In addition to custom design, we offer a range of standard free-standing kits from 100-1100W. We design and engineer custom Solar Power Systems for Oilfield Services, Gas Pipelines, Off-shore Drilling.

P-107 stainless steel locking system provides double locking. Various cabinet's mounting plates accommodate a variety of 15/25/35kV, 200A or 600A junctions. Four eye-bolts allow the line-person to simply hook-up the cabinet, position it over the cables, and place it in the excavated area. ND.

As a procurement manager or industrial buyer, your biggest challenge in solar projects is not just negotiating price—it's ensuring that the equipment you purchase passes compliance checks, integrates smoothly with the grid, and performs reliably in the field. Selecting the wrong photovoltaic (PV).

It can be used in solar photovoltaic power generation systems, and can also be

used to convert, distribute and control electrical energy between photovoltaic inverters and transformers or loads. Wide current coverage, up to 4000A, breaking capacity up to 80KA. The cabinet body is fully assembled.
