Sodium-ion battery development has been a major story in 2025, as Chris Arcus has been especially eager to highlight and explain. In 2026, I think it could be the biggest battery topic. Battery giant CATL, the largest battery producer in the world, is leaning into the topic and made a notable.

Sodium-ion batteries are rapidly emerging as a promising solution for cost-effective energy storage. What Are Sodium-Ion Batteries?

Sodium-ion batteries (SIBs) represent a significant shift in energy storage technology. Unlike Lithium-ion batteries, which rely on scarce lithium, SIBs use abundant.
