

Solar b-grade panel manufacturers

Overview

The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Canadian Solar, Illuminate USA, and T1 Energy. These companies produce high-performance solar panels for residential, commercial, and utility-scale installations.

The top five solar panel manufacturers in the U.S. are First Solar, Qcells, Canadian Solar, Illuminate USA, and T1 Energy. These companies produce high-performance solar panels for residential, commercial, and utility-scale installations.

Thomas has been North America's number one industrial sourcing platform for more than 125 years. On Thomasnet, you'll find more than 580 suppliers of solar panels in the USA. You can filter these companies by location, certifications, and more factors to easily find and connect with the right.

We've rated thousands of solar panels made by dozens of manufacturers based on efficiency, power output, warranty, and other important specs that allow each panel to make the most possible electricity over the longest period. Some of these American-made panels (and the inverters they connect to).

The current top five USA solar panel manufacturers by peak manufacturing capacity are: American-made solar panels may not always come from American companies, but they are built by American workers. Here's more information about five of the biggest, best companies that make solar panels in the USA.

In 2025, the top five solar panel manufacturers in the U.S. based on production capacity are: Although some of these companies are foreign-owned, they all manufacture solar panels on American soil, providing jobs for thousands of workers. Let's take a closer look at these leading solar.

Whether you are installing solar for your home, business, or a large-scale project, knowing the top brands helps you avoid costly mistakes from low-yield systems. In this article, we list the top 12 solar PV panel manufacturers we vouch for. These 12 suppliers are known for their durability.

Solar panel manufacturers in the USA are steering record-breaking solar installations in 2025. According to the US Department of Energy, in Q1 of 2025, the US installed a capacity of 10.8 GWdc of new solar capacity, while 8.6 GW of

module manufacturing capacity was added. Texas and Florida recorded.
